

Tactile Paving

Cycleway

Kilsaran's cycleway paving solutions are engineered to deliver both functionality and safety, particularly in urban environments where clear demarcation between pedestrian and cycling zones is essential

Colour & 3D Profile

Buff

Features

- Concrete flag Paving
- Cycleway Tactile paving is used to indicate the beginning and end of shared pedestrian and cycleway paths which are not differentiated by two levels
- Normally cycleway tactile paving is laid transverse to indicate the pedestrian surface and longitudinally to indicate the cycling surface at the start and end of shared path routes
- Available in a 50mm depth for pedestrian traffic

Benefits

- Tactile Flags are easily replaceable, allowing the removal of trip hazards.
- Universal & easily recognisable

- Hard-wearing surface
- Vibrant, long-lasting colours
